FITTING INSTRUCTIONS

- Fit the spacer with the smaller spigot (S0580) into the left hand side of front spindle.
- Fit one nut and washer on the spindle-bar (SB015) (the end with shorter thread), engage the nut so the plastic insert of nut is fully engaged.
- Feed spindle-bar with nut and washer through either bobbin (M0442 M8) and through spindle spacer (from the left hand side) just fitted.
- Place remaining spacer with the larger spigot (S0581) over the exposed right hand end of spindle-bar so the spigot locates in right hand side of spindle.
- Fit washer and nut from kit onto thread and tighten until both nuts are engaged in the nylon and equal amounts protrude from either side. Do not overtighten – the nyloc nuts will hold it tight.
