

**FITTING INSTRUCTIONS FOR FSS0002 FORK SPINDLE SLIDERS
TO FIT TRIUMPH DAYTONA 675 2013-/STREET TRIPLE RS 765 2017-
/DAYTONA MOTO2 765 2020-**

Picture A

Picture B

This Kit contains the items pictured and labelled over page.

Some parts may be shown for clarity of instructions only.

Do not proceed until you are sure all parts are present.

Please read all instructions before proceeding.

**IF IN ANY DOUBT WHEN FITTING OUR PRODUCTS, CONSULT ONE OF OUR DEALERS
OR HAVE FITTED BY A QUALIFIED TECHNICIAN.**

Please note that the way the kit is packed does not necessarily represent the way of mounting to the bike.

In the event of rubber washers being used to hold components onto bolts, these rubber washers can be thrown away.

ITEM 5	M6 NYLOC NUTS	2
ITEM 6	M6 WASHERS (16mm O/D)	2

ASSEMBLY DIAGRAM

R&G

FITTING INSTRUCTIONS

- Fit one nut (**item 5**) and one washer (**item 6**) to the spindle bar (**item 4**), engaging the nut so the plastic insert of the nut is fully engaged and the bar protrudes by 1 or 2 threads. It is recommended to use a small amount of superglue or Loctite to fix this nut as this will aid when tightening the opposite side later.
- Feed the spindle bar with nut and washer through either of the cotton reels (**item 1**) and then through the spacer with the smaller location diameter (**item 3**) facing away from the cotton reel as shown in the **assembly diagram**, then slide this assembly into the right hand side of the front spindle ensuring the spacer is located into the spindle.
- Moving to the right-hand side of the bike, slide the remaining spacer (**item 2**) over the exposed end of the spindle bar so the internal diameter end sits over the protruding wheel spindle as shown in the assembly diagram.
- Fit the remaining cotton reel (**item 1**) over the spindle bar and up to the spacer, then fit the remaining washer (**item 6**) and nut (**item 5**) from the kit onto the thread protruding from the cotton reel.
- Finally tighten the nut on both sides evenly using two 10mm sockets and ensure that the plastic insert of both nuts are fully engaged and the protruding threads are equal on both sides. Check the fork protectors are secure and held firmly against the spacers and do not spin.
- Do not overtighten – the Nyloc nuts will hold it tight.
- After riding the bike, check the tightness of the nuts regularly (e.g. when cleaning the bike).

ISSUE 1 - 31/03/2021 (NSY)

CONSUMER NOTICE

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorized (if not pre-authorized the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P – at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.

NOTICE DE MONTAGE

- Montez un écrou (article 5) et une rondelle (article 6) sur la barre (article 4), en engageant l'écrou de sorte que l'insert en plastique de l'écrou soit complètement engagé et que la barre dépasse de 1 ou 2 filets. Il est recommandé d'utiliser une petite quantité de superglue ou de Loctite pour fixer cet écrou car cela facilitera le serrage du côté opposé plus tard.
- Faites passer la barre avec l'écrou et la rondelle à travers l'une des bobines (article 1), puis dans l'entretoise avec le plus petit diamètre d'emplacement (article 3) face à la bobine comme indiqué sur le schéma d'assemblage, puis faites glisser cet ensemble dans le côté droit de la barre avant en veillant à ce que l'entretoise se trouve dans la broche.
- En vous déplaçant du côté droit de la moto, faites glisser l'entretoise restante (article 2) sur l'extrémité exposée de la barre de sorte que l'extrémité du diamètre interne repose sur l'axe de roue dépassant comme indiqué dans le schéma d'assemblage.
- Monter la bobine restante (article 1) sur la barre et jusqu'à l'entretoise, puis monter la rondelle (article 6) et l'écrou (article 5) restants du kit sur le fil dépassant de la bobine.
- Enfin, serrez l'écrou des deux côtés uniformément à l'aide de deux douilles de 10 mm et assurez-vous que l'insert en plastique des deux écrous soit complètement engagé et que les filets saillants sont égaux des deux côtés. Vérifiez que les protections fourche soient sécurisés et maintenues fermement contre les entretoises et ne tournent pas.
- Ne serrez pas excessivement - les écrous Nyloc le maintiendront bien serré.
- Après avoir fait de la moto, vérifiez régulièrement le serrage des écrous (par exemple lors du nettoyage de la moto).
