## **FITTING INSTRUCTIONS**

- Remove the OEM pillion footrests on both sides of the bike.
- Place two of the M8x20mm long counter-sunk bolts (item 2) through the holes in one of the transport hooks (item 1).
- Offer the R&G tie-down hook into position and tighten into the thread on the subframe, as shown above.
- Repeat for the opposite side.
  
- *Please ensure that when strapping the motorcycle down the ratchet straps do not come into contact with any part of the motorcycle, as the strap is likely to rub during transit and may cause damage.*
  
- We recommend that fabric from the straps be in contact with the product, as opposed to the hook on the end of the strap. This will increase the lifespan of the protective coating on the product.
  
- Do not overtighten straps attached to the product, as it would be possible to bend or break the product with excessive force. If in any doubt please consult a professional.
  
- R&G cannot be held liable for any breakages to straps, or consequential damage from this, as a result of fraying/breaking of the straps, or incorrect use. Please ensure that all bodywork of the motorcycle which may come in contact with the straps (e.g. plastic panels, exhausts, swingarms) are protected or left completely clear of the straps.
  
- While we may show certain applications where the product is being used for attaching luggage to a motorcycle, this is not a general recommendation and cannot be achieved on all motorcycles.
  
- Care and attention needs to be taken whenever the product is in use for securing luggage or for tying the motorcycle down. R&G cannot accept any responsibility for inappropriate use or decisions on the part of the user. If in doubt, always consult a professional.
